

**Ridge rolls:
Micro-Roll and Eko-Roll**

Used for ridges and hips. Its structure allows the air pass through letting the ridge to be ventilated fully. At the same time it doesn't let condensed water inside as well as other water splashes occurring caused by rain, wind or snow.

Kolor: Colors: brick-red, brown, red, chestnut, anthracite

Dimensions: 300 x 5000 mm, 310 x 500mm,
370 x 500mm

We also produce other types of rolls with design registered by a client.
